

*The Arc of Bismarck Presents
A Community Education Workshop...*

Computer Accessibility & Assistive Technology for People with Learning Disabilities

Richard Dodds, Presenter

Thursday, March 4, 2010 6 - 9 PM
Concordia College Centrum
Knutson Campus Center 901 S. 8th Street Moorhead

**Get the most from the technology you already have!
It's easier than you think!**

Technology can open doors and break down barriers for children, youth and adults with disabilities. Whether in the classroom or workplace, assistive technology (including devices, software, recordings and much more) can increase, maintain or improve the capabilities of individuals with disabilities.

With common sense and humor, Richard Dodds enlightens and entertains participants in workshops and trainings across the United States that are fast-paced, witty and loaded with useful information. Dodds offers clear, simple, affordable and therefore do-able solutions.

Who should attend?

This workshop is appropriate for the general public including parents, educators, service providers, individuals with disabilities, advocates & students.

Everyone is Welcome!

The workshop is **free**, however, **please register** @ 1-888-258-7949 or email joyce@thearcofbismarck.org to help us plan appropriately. Walk-ins are welcome.

*This event is made possible with grant funds from The Otto Bremer Foundation,
The ND State Council on Developmental Disabilities, The Arc of Bismarck,
The Walter L. Braun & Lucille Braun Family Charitable Gift Fund,
Basin Electric Power Cooperative & Sam McQuade Senior's Charity Softball Tournament.*
